The only AMERICAN MADE vapor steam cleaner, the Therma-Kleen THERMA-STEAM model is easy to use. Just pour water into the stainless steel boiler, plug into an electrical outlet and within minutes the cleaner will be ready to deliver powerful cleaning pressures of 80 PSI/ 5.5 bar pressure at 300°F/149°C temperature.

The Therma-Kleen THERMA-STEAM model is ideal for sanitizing and de-greasing areas where water should not and cannot be used; i.e. In kitchen ovens, on floors, tile, and refrigerators; also for dining areas, carpets and seating areas; for auto detail shops, to clean seats, carpets and dashboards; for nursing homes and hospitals, to sanitize mattresses (killing dust mites), wheel chairs, etc.

Included Accessories:

Constructed with an all-stainless steel body, boiler and heating element. ***LIFETIME Warranty on the boiler.***

Other cleaning ideas for the Therma-Kleen vapor steam models are available for many industries. If you are interested in Therma-Kleen higher pressure and volume models for big jobs, please look at our Electric or Propane High Pressure Steam Cleaning Equipment.
