

THERMA-KLEEN

TECH SHEET

Auto Cleaning/Detailing

Therma-Kleen offers several different options for you Auto Cleaning situation.

- Dry Steam Cleaners
- Electric Wet Steam Cleaners
- Propane Wet Steam Cleaners

Each of the options offer Auto Detailers a different approach

DRY STEAM – interior Use:

Systems up to 160 psi

Temperatures up to 380° F

- This option is primarily for Auto Interiors as it produces (as the name Dry Steam applies) a vapor which contains around 5% moisture, making it ideal for:
 - Carpet – Use triangle brush to removes stains, eliminates Odor causing organisms, drives out embedded Cigarette odors, brings life and color back to carpet
 - Floor Mats – Cleans, Rejuvenates and restores color
 - Seats – removes stains, sanitizes, eliminates Odor causing organism, drives out embedded Cigarette Odors, restores to like new condition
 - Cloth – Use the triangle brush with cloth attached
 - Vinyl – Move triangle brush smoothly over the surface
 - Leather – The triangle brush with cloth attached. Move evenly over surface and not keeping the brush in one place for too long.
 - Plastic – Cleans, sanitizes, restore to origin color, rejuvenates texture. Use hose hair or nylon detail brush
 - Dash – Cleans, sanitizes, restore to original color. Use triangle brush on large surfaces and the horsehair brush on small surfaces and air vents

ELECTRIC WET STEAM:

Systems up to 600 psi

Temperatures up to 180° F

- Primarily used to clean the outside of the vehicle, engine compartment and wheels.
- Usually used in an indoor setting

PROPANE WET STEAM:

Systems up to 1,300 psi

Temperature up to 340° F

- Primarily used to clean the outside of the vehicle, engine compartment and wheels.
- Usually used in an outdoor setting
