## TECH SHEET

### Country Clubs & Banquet Venues

To attract customers these venues must reach for the highest standards in cleanliness and comfort. Like all other enterprises, costs are always a consideration. In this regard the Super-Heated Dry Vapor Steam produced by Therma-Kleen® systems can be of assistance, by:

- First: Improving Appearance and Sanitizing:
  - Removing grease and grime from Bathrooms, Kitchens and Public Areas
  - By Eliminating Infectious Pathogens, Mold & Mildew
  - Eliminating odors caused by mold, mildew, cigarette smoke embedded in carpets, drapes, furniture, etc.
  - Using a Therma-Kleen® unit to clean equipment will keep them looking like new, kill unwanted germs, and not adversely affect surfaces finishes as chemical will.
- Next the Bar area:
  - Bars are notorious as a breeding ground for infectious organisms.
  - Therma-Kleen® units will easily clean and sanitize the whole bar area.
- Those infamous locker rooms:
  - Our systems can make short work of these areas by cleaning and sanitizing all surfaces in one pass.
  - Let us not forget those ticks, sand flees & dust mites which will be killed by the super-heated steam on contact.
- Next: let's address Cost:
  - Therma-Kleen® Dry Vapor Units use only WATER.
  - There are no costly Toxic Chemicals to consume.,
  - There is no Toxic Fumes or Residue to irritate employees and customers.
  - The Dry Nano Vapor Molecules penetrate the smallest of cracks and pores, thereby more effectively cleaning than chemicals ever can.
  - There will be less time spend cleaning & sanitizing than with chemicals.
  - Hence a potential cost savings of up to 80%.

Steam temperatures up to 380° and pressures up to 160 psi ensure maximum efficiency and pathogen kill rate.
